Summary

Back-End .NET Developer with a strong focus on building reliable, secure, and efficient web applications. Proficient in C#, ASP .NET Core, SQL Server and PostgreSQL, with practical experience in creating RESTful APIs, structuring clean database designs, and integrating with front-end teams to deliver complete solutions. Known for writing clean, maintainable code and approaching problems with a structured, hands-on mindset. Always driven to learn, improve, and deliver high-quality results in real-world projects.

Education

09/2022 – 06/2026 **Bachelor's degree in Computer Science and Artificial Intelligence**
Helwan University

Experience

06/2025 – 12/2025 **DEPI**
Full-Stack .NET Web Developer
ASP .NET MVC And RESTful APIs With Clean Architecture

Skills

Technical Skills

- **Languages:**
C#, C, C++, Java, php, JavaScript, HTML, CSS
- **Databases:**
SQL Server, MySQL, PostgreSQL, Oracle Database
- **Frameworks & Technologies:**
ASP .NET Core, Entity Framework Core, LINQ, MVC, RESTful APIs
- **Securing:** Identity, JWT
- **Testing(in progress):** Unit Testing

Soft Skills

- Communication Skills
- Presentation
- Problem Solving
- Fast Learner
- Team Collaboration
- Time Management

Projects

RentMate [🔗](#)

.NET Web API

Developed a property rental platform that connects landlords and tenants, with admin oversight. The backend was built using ASP .NET Core Web API with Entity Framework Core, JWT authentication, and SignalR for real-time messaging and property status updates. Applied a clean layered architecture using the Unit of Work and Repository patterns. The system includes role-based access, live chat, and rental proposal workflows, all supported by a well-structured SQL Server database.
